

HOPE for HIE

awareness • education • support

OUR MISSION: To foster hope in families affected by HIE (hypoxic ischemic encephalopathy) through awareness, education and support.

As a medical professional, you're tasked with the challenge of delivering exceptional care, even amidst devastating circumstances. For family members and loved ones receiving a hypoxic ischemic encephalopathy (HIE) diagnosis, it may be impossible to provide comfort with so many lingering questions. Regardless of your patient's projected outcome, you can let those impacted know that they are not alone.

Hope for HIE is the premier resource for families whose children have been diagnosed with HIE. Within this international community, we provide a variety of support outlets, both in person and online, to find hope in the unexpected journey.

Hope for HIE is a confirmed 501(c)3 non-profit registered with the IRS. The organization was incorporated legally in the state of Michigan in 2013 and is governed by a U.S.-based board of directors who oversees the group's mission and vision.

UNCONDITIONAL SUPPORT FOR ALL FAMILIES

Hope for HIE is currently the only formal organization focused on serving families affected by HIE, including injuries that happened at birth or throughout childhood. Initially started in 2010 as a virtual network of parents looking to connect, the organization currently serves thousands of families around the world. Our passion for supporting others is deep because we're all parents of children affected by HIE.

In addition to raising awareness of HIE, we provide support in the form of friendship, advocacy, empathy and knowledge to all connected through the HIE diagnosis. Ultimately, these resources and encouragement can have a dramatic and positive impact on families' outlook for the future.

Whether you have patients taking their first steps on this path, or those who are well into living life touched by an HIE diagnosis, Hope for HIE offers a place to relate, replenish and revitalize one's sense of hope.

Please help us spread the word and share in our hope ... **Hope for HIE.**
